ConnectedCooking

Quick Guide.
## Temperature measurement.

RATIONAL

Activate the thermometer by unfolding the probe and open the checkpoint in the app.

1

Connect the thermometer to the app via "Connect sensor".

(!) **Check your smartphone settings: Access via Bluetooth enabled**

2

---

5 Clean the probe with a damp cloth.

(!) Do not use solvents.

If the connection is **successful**, you will see "Disconnect".

3

Save the measured value by pressing the (HOLD) button. It is saved in the app via [>].

(!) **The value must no longer fluctuate and must be stable.**
